University of Buenos Aires | 2019 – 2021

Bachelor's in Product Design
University of Buenos Aires | 2016 – 2019

UX/UI Design
Coderhouse | 2022

PERSONAL PROFILE

UX/UI Designer with 4+ years of experience creating user-centered digital products in SaaS, e-commerce, fintech, and mobile domains. Skilled in translating complex user needs and business requirements into intuitive, accessible interfaces — from early research through high-fidelity prototypes and design systems. Comfortable working closely with product managers and engineers in agile environments, and passionate about building digital products that genuinely improve people's financial and everyday lives.

WORK EXPERIENCE

Semi-Senior UX/UI Designer
Delphi One | 2025 – Present

- Led end-to-end UX optimization initiatives through structured usability testing, interaction analysis, and iterative prototyping in Figma.
- Translated user research findings into actionable product decisions, bridging the gap between user needs and business strategy.
- Collaborated directly with engineering teams to define and deliver new product functionalities, ensuring design feasibility and consistent implementation.
- Contributed to the evolution of the product design system, improving component reusability and design consistency at scale.

UX/UI Designer
UX Design Pilot LLC | 2022 – 2025

- Owned end-to-end design for digital products across SaaS and e-commerce platforms — from discovery and wireframing to final handoff.
- Conducted qualitative and quantitative user research (interviews, surveys, analytics review) to identify pain points and validate design solutions.
- Built and maintained accessible, responsive design systems aligned with WCAG guidelines, enabling faster delivery across teams.

UX/UI Designer
Habit Driven | 2023 – 2024

- Designed a mobile app focused on behavioral change and habit formation, applying psychology-driven UX principles to improve engagement.
- Built complete UX flows from onboarding through retention optimization, significantly improving user activation rates.

Project Manager – Retail Innovation
Mazalosa | 2022 – 2023

- Led innovation projects that merged physical retail with digital experiences, applying human-centered design thinking throughout.
- Designed omnichannel flows and in-store digital systems, gaining experience with end-to-end service design and stakeholder management.
